PROFESSIONAL SUMMARY

Machine Learning and AI Automation Engineer with hands-on experience building production LLM and RAG systems, hybrid vector retrieval, NLP pipelines, and n8n workflow automations that connect to real business processes. Delivered a live, deployed AI assistant for a paying client and worked on AI systems for a US-based e-commerce client at DCUBE Technologies. Proficient in Python, LangChain/LangGraph, and shipping end-to-end AI systems on free-tier and self-hosted infrastructure.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Dart
LLM & NLP: LangChain, LangGraph, Hugging Face Transformers, OpenAI API, Google Gemini API, Groq, RAG Systems, Hybrid Retrieval (RRF), HyDE, Prompt Engineering, AST-Aware Chunking
ML/DL & Data: TensorFlow, PyTorch, Keras, Scikit-learn, ChromaDB, Supabase, Pandas, NumPy
Automation & Backend: n8n, FastAPI, Next.js, REST APIs, Webhooks, Docker, Git
Deployment: Railway, Vercel, Oracle Cloud (Always Free), Self-Hosted

PROFESSIONAL EXPERIENCE

Junior Machine Learning Engineer — DCUBE Technologies (Pvt) Ltd, NUST Islamabad *Aug 2025 – Aug 2026*

- Improved taxonomy/field-mapping accuracy for a US-based e-commerce client's product mapping tool by analyzing key columns against a reference taxonomy system.
- Built an automated WhatsApp AI Agent using NLP and transformer models to handle end-to-end conversational customer interactions.
- Developed an LLM-powered Promotion Optimization System (LangChain + ChromaDB) for vector search and retail insight generation.
- Built the Belami Asset Automation Tool (Streamlit) to automate enterprise asset template processing and validation for vendor Excel files; managed Akeneo product data and image-processing pipelines.

Machine Learning Engineer Intern — DCUBE Technologies (Pvt) Ltd, NUST Islamabad *Apr 2025 – Aug 2025*

- Engineered a retail promotion optimization system with a Gradio and Flutter UI; fine-tuned Hugging Face transformer models for personalized recommendations and uplift prediction.

KEY PROJECTS

Softoras AI Assistant — Freelance Client Project, 2026 — *Next.js, Supabase, Google Gemini API, Railway*

- Built an AI assistant inside a client's ERP (business management software): staff ask questions in English or Urdu and get answers from their own business data.
- It also helps with tasks such as creating invoices or contacting the help team, and always shows a preview and asks for confirmation before changing anything. Smart caching keeps AI running cost low. Deployed and live.

CodeSage — Natural-Language Code Search (RAG) — *Python, LangChain, Hybrid Retrieval, HyDE, React*

- Built a RAG system that answers natural-language questions about a codebase and cites exact file/line evidence, using AST-aware chunking, hybrid retrieval with RRF, and HyDE to boost retrieval precision over naive vector search.
- Designed a Groq/Gemini LLM router balancing cost, latency, and quality; shipped a React frontend, deployed on Oracle Cloud Always Free.

LexMind AI — Multi-Agent Legal RAG Platform — *LangGraph, Groq (Llama 3.1 70B), ChromaDB, FastAPI, React*

- Built a multi-agent legal intelligence platform using LangGraph to orchestrate specialized agents over a ChromaDB vector store for legal document retrieval, risk detection, and timeline analysis; frontend live on Vercel.

Faceless Video Automation Pipeline — *n8n, Groq, Pollinations.ai, FFmpeg*

- Designed a 27-node, self-hosted n8n workflow that converts a form submission into a fully voiced, captioned short-form video delivered by email, automating script generation, image generation, and video assembly end-to-end on free-tier infrastructure.

AI Property Assistant — Real Estate Chatbot — *n8n, Supabase, OpenAI GPT, OpenWeatherMap API*

- Built a stateful real estate chatbot with dynamic tool switching, city-based response caching, and live weather context, orchestrated entirely as an n8n workflow with Supabase-backed conversation state.

NEXUS — Multi-Agent Voice Assistant — *Python, FastAPI, Groq Whisper/Llama 3.3-70B, WebSocket*

- Built a CPU-only voice assistant that transcribes speech and routes each turn to one of four specialist agents, runs tools, and replies via neural TTS, with an Ollama fallback LLM for rate-limit resilience; supports bilingual English and Roman Urdu conversations.

EDUCATION & CERTIFICATIONS

B.S. Computer Science — COMSATS University Islamabad, Abbottabad Campus (2021–2025), Specialization: AI, ML, Mobile Development
Certifications: Machine Learning, Advanced Learning Algorithms, NLP, AI For Everyone (Stanford University); ChatGPT Prompt Engineering (DeepLearning.AI); UX Design Foundations (Google)
